Numismatic Literature

39408. **Album, Stephen and Goodwin, Tony**, Sylloge of Islamic Coins in the Ashmolean Museum: Volume 9, Iran after the Mongol Invasion. 2001. 240 pages, including 89 plates, with descriptive text, hardcover with dust jacket.
This volume contains nearly 1800 coins of the 13th -19th centuries from Iran, Afghanistan and neighbouring lands. It covers the following dynasties: Ikhanid, Timurid, Qara Quyunlu, Aq Quyunlu, Safavid, Qaja, Durrani and Barakzay. The introduction offers not only a guide to the catalogue, but also sets out an agenda for the study of the monetary history of the period. Late medieval Iranian coinage offers the historian the earliest opportunity to examine the relationship between coinage issue in the Islamic world and the monetary policies, which underlie them. The collections which contribute to this volume are all housed in the Heberden coin room, Ashmolean Museum. The most important of these is undoubtedly that part of the Thorburn collection which was acquired by the Coin Room in 1966. The material is arranged as in SICA volume 10 (Arabia and East Africa), that is, by mint and chronologically within mints. \$88
39407. **Album, Stephen and Goodwyn, Tony**, Sylloge of Islamic Coins in the Ashmolean Museum: Volume 1, The Pre-Reform Coinage of the Early Islamic Period; Oxford, 2002, 121 pgs, 47 plates, each with descriptive text, hardcover with dust jacket.
This volume contains just under 750 coins of the pre-reform period from all parts of the Islamic world. It is particularly strong in the Arab-Sasanian silver and Arab-Byzantine gold and copper issues. The two introductory sections represent significant contributions in the field. They offer the first comprehensive analysis of the monetary history of the early Islamic period since Walker's pioneering catalogues of the British Museum collections and are intended to serve as an introduction for the non-specialist as well as the numismatist. The material is arranged by mint and chronologically within mints. \$97
