Brief introduction to Islamic coin collecting & short notes on coinage and standard references throughout. Bibliography with much background information. Six-level rarity guide. - 122270 **Album, Stephen**, Checklist of Islamic Coins: 3rd Edition, Spiral-Bound Softcover, Stephen Album, Santa Rosa, 2011, numbered list of coin-issuing Islamic rulers from c.652 to c.1890 by denomination and often by type; ±6000 listings. Brief introduction to Islamic coin collecting & short notes on coinage and standard references throughout. Bibliography with much background information. Six-level rarity guide. Includes North Africa, the Middle East, Anatolia & the Caucasus, and Central Asia, 324 pages, no plates, white spiral-bound soft cover. \$35
125886. **Allan, John**, A Catalogue of the Indian Coins in the British Museum: Coins of Gupta Dynasties and of Sasanka, King of Gauda, Originally published 1914 (British Museum reprint of 1967), 181 pages, 24 plates in good quality, hardcover with dust jacket. Altekar's work replaces this informationally & is more comprehensive, but this is still a good collection and the photo record is worth having even at reprint quality. The 1967 London reprint is better than later India reprints. \$55
124690. **Elliot, Sir W.**, Coins of Southern India, Varanasi (Banares) 1970, reprint of the 1884 original, 151 pages, 4 plates, hardcover, with dust jacket. Classic reference in this area, though much important work has been done since. \$40
39369. **Herrli, Hans**, The Coins of the Sikhs, Nagpur, 2004, 2nd edition, 301 pages, hardcover. Finally available, an excellent catalog of the Sikh coinage, including all mints, such as Patiala, Nabha and unidentified mints. Inscription translations, date varieties, brief overall history for the Sikhs and for each mint city. Virtually every coin illustrated by hand. \$35
143068. **Kampmann, Ursula**, Numismatische Wörterbuch, Battenberg, 2012, softcover, 112 pages, Deutsch-Englisch and English-German Numismatic Dictionary. The author has a German-English dictionary specifically for numismatic technical terms which makes it so the layman and the professional can more easily communicate about the hobby. Standard German-English dictionaries are not as useful as this wonderful little book since in numismatics there are many technical terms, which are not found in a regular dictionary. Great to use when reading auction catalogs or websites in either language. \$14
124712. **Smith, Ward D. & Brian Matravets**, Chinese Banknotes, Shirjeh Publishers, Menlo Park, California, 1970, 225 pages, photos throughout, hardcover, English text with bank names in Chinese characters. An extensive alphabetical catalogue of Chinese banknotes with explanations of all the issuing entities, multiple appendices and indices. Most notes illustrated. Much more detailed than Pick. Best one-volume work on Chinese paper and still much referenced, signed by Ward Smith. \$120
- 125993 **Treadwell, Luke**, Buyid Coinage: A Die Corpus (322-445 A.H.), Ashmolean Museum, Oxford, 2001, 247 pages, 172 plates, hardcover with dust jacket, English text with Arabic legends written out. An extremely thorough study of the Buwayhid/Buyid dynasty. He describes every known die variant of every mint of the dynasty, with full descriptions of the legends on the coins in the text and excellent plates at the back. There are indices of names and secondary names and titles, a good map of the geographic extent of the Buwayhids, and a genealogical tree. \$75

39358 **Yuanjie, Zhu**, Xinjiang Numismatics, Xinjiang Art and Photo Press Educational and Cultural Press, Hong Kong, 8 pages of charts, 234 pages, hardcover. Numerous color photos and diagrams of coins, sycees, and banknotes throughout explaining the numismatic history of the Xinjiang region from the Han Dynasty through modern times. Also includes section on foreign currency imported into Xinjiang during the China trade. Text in Chinese and English. \$75
