Kampmann, Ursula, Numismatische Wörterbuch, Battenberg, 2012, softcover, 112 pages, Deutsch-Englisch and English-German Numismatic Dictionary. The author has a German-English dictionary specifically for numismatic technical terms which makes it so the layman and the professional can more easily communicate about the hobby. Standard German-English dictionaries are not as useful as this wonderful little book since in numismatics there are many technical terms, which are not found in a regular dictionary. Great to use when reading auction catalogs or websites in either language. \$14</p> <p>125993 Treadwell, Luke, Buyid Coinage: A Die Corpus (322-445 A.H.), Ashmolean Museum, Oxford, 2001, 247 pages, 172 plates, hardcover with dust jacket, English text with Arabic legends written out. An extremely thorough study of the Buwayhid/Buyid dynasty. He describes every known die variant of every mint of the dynasty, with full descriptions of the legends on the coins in the text and excellent plates at the back. There are indices of names and secondary names and titles, a good map of the geographic extent of the Buwayhids, and a genealogical tree. \$75</p> <p>39358 Yuanjie, Zhu, Xinjiang Numismatics, Xinjiang Art and Photo Press Educational and Cultural Press, Hong Kong, 8 pages of charts, 234 pages, hardcover.
