*The Nicobar was one of very few famous shipwrecks of the Danish East India Company. The Nicobar was outbound to India with a load of copper plates from Sweden that were actually a form of coins, inasmuch as each one bore a date, denomination and mintmark, along with the monogram of the king or queen. Demonetized in 1771, the copper "plate money" became more like ingots, with trade value at the current rate for pure copper. But the Nicobar never reached its destination: After stopping at False Bay to replenish supplies and offload sick crew, the ship left again on July 10, 1783, and ran aground in a storm that night. The wreck was rediscovered in 1987 by local fishermen. According to Tingstrom, 344 examples of this type are known including 332 pieces from the Nicobar.*

They were designed by Philip Martiny and show the Cuban coat of arms on the obverse and a personification of Liberty on the reverse. Gorham Manufacturing Co., of Providence, R.I., was contracted to produce the pieces, but could not initially, so in July 1897, Dunn Air-Brake in Philadelphia struck the first 828 pieces, using dies and planchets that Gorham had provided. *The Sombrerete Mint was opened on October 8, 1810 and produced coins there until July 16, 1811. It reopened for a short time in 1812, but closed again before the end of that year.*

1788. **MEXICO: Fernando VII**, 1808-1821, AR 2 reales, 1811, KM-186, Zacatecas Royalist issue, L.V.O. local arms type, the usual areas of weakness and minor flaws, two-year type (the other date, 1810, is quite rare), Choice VF, S \$225 - 275

1789. **MEXICO: Fernando VII**, 1808-1821, AR 8 reales, 1811, KM-190, El-MX80, Zacatecas Royalist issue, L.V.O. royal arms type, somewhat crude, a few tiny scratches, attractive tone, much better strike and grade than normally encountered for this type, EF, R \$2,000 - 2,500

*Coin production started on November 14, 1810 in Zacatecas for the Royalists. The Insurgents captured the city on April 15, 1811, and made some coins dated 1811 there. The city was retaken by the Royalists on May 21, 1811, and the standard portrait types were struck there through 1822.*

1790. **MEXICO: Fernando VII**, 1808-1821, AR 8 reales, ND, KM-194.2, Chihuahua Royalist issue, 1815 CaRP 8 reales (KM-111.1) struck over KM-123 with L.C.M. (La Comandancia Militar or La Caja Militar) countermark, a few weak details, much of original host visible, including the L.C.M. countermark and the two original counter marks, rare host date, VF on crude VF host, R \$2,500 - 3,000

*According to Max Keech, the best known of the Royalist counterstamps is that of La Comandancia Militar (L.C.M.), used in Northern Mexico (Chihuahua and Monclova). These counterstamps were used from 1811 to 1814: The LCM counterstamp is quite rare on 1814 hosts, strongly indicating the counterstamp was discontinued early in that year. In fact, the few Royalist counterstamps of 1814 are all rare and Insurgent stamps are nonexistent. Therefore, the L.C.M. countermark is actually on the host, not the 1815 overstrike.*

1791. **MEXICO: Fernando VII**, 1808-1821, AE medal (56.85g), 20 October 1810, 54mm, for the glorious victory at the battle of Monté de las Cruces, and in honor of Fernando VII: complex battle scene, and above, a lion and a cherub holding up the portrait of Fernando // 10-line text, announcing the victory and praising the commanders Trujillo, Mendivil & Bringas, some original luster, AU, R \$130 - 170

Guerrero, uniformed bust right with "J. *The only other specimen that we could locate was in the Numismatica Genevensis SA auction of December 2008, where the piece in approximately AU condition brought about \$14,940. An extremely rare and desirable item.*

*Agustin de Iturbide began his career as an officer in the Spanish army. As a general, he was charged with negotiating with the Mexican Insurgents. Won to the independence cause, he turned against Spain and was proclaimed emperor of Mexico on July 21, 1822. He organized immense festivities that began January 24, 1823. His initial popularity did not prevent him from being ousted the following March 19th. Exiled to Italy and then to London, he tried to return to Mexico in 1824. Immediately arrested, he was shot by the local authorities. His body was finally buried in 1838 in the cathedral of Mexico City with the title of "Liberator National."*

*This piece is featured on the cover of this auction catalog.*

1809. **MEXICO:** AE centavo, 1898-Mo, KM-393, one-year type, much red, great pedigree, NGC graded MS65 RB, ex R. L. Lissner Collection \$125 - 150

1810. **MEXICO:** AR 5 centavos, 1887-Go, KM-398.5, assayer R/S, superlative luster and strike, hint of lovely peripheral tone, a superb specimen, highest graded by NGC, NGC graded MS67, ex R. L. Lissner Collection \$125 - 175

*In 1949 the San Francisco Mint struck 2,000,000 Mexican pesos dated 1898 for use in China. The 1898 original reverse has 139 denticles and the restrike has 134. The original coins have the tops of the "Mo" lined up and the restrikes have the "o" in "Mo" moved higher than the "M". These were made for the Chiang Kai-Shek Nationalist government (Kuomintang) which had introduced a new silver-based currency. The Nationalists were losing the Chinese civil war to Mao Tse-Tung's Communists and there was rampant inflation in the areas still controlled by the Nationalists.*

1818. **MEXICO:** AV 10 pesos, 1903-M, KM-413.7, assayer M, prooflike, though not noted on holder, tied for finest graded by NGC, mintage of only 713 pieces! NGC graded MS65, **R** \$2,000 - 2,400

*The balance scale series of gold coinage was generally made in very small quantities, looking at the mintage figures. Most dates of the various issues were only produced in the four-figure range, and many were only minted in the hundreds. This is an area that seems to have a lot of potential, as the rarity is certainly there!*
