Mongol Dynasties

397. **GREAT MONGOLS: Chingiz Khan**, 1206-1227, AR dirham (3.03g), NM [Ghazna], ND, A-1967, in the name of Chingiz Khan, Zeno type A1/B1, off-center strike (as is often the case), VF-EF, **R**, ex *M.H. Mirza Collection* \$800 - 1,000

Derived from type A-1721 in the name of the Khwarizmshahid ruler 'Ala al-Din Muhammad, who was chased by the Mongols to the Indus River in AH617, during which time the Mongol army took possession of Ghazna. It is presumed that this type was struck at or near Ghazna during this ambition.

398. **GREAT MONGOLS: Anonymous**, ca. 1220s-1230s, AV dinar (4.63g), Badakhshan, ND, A-A1967, Zeno-90274 (same dies), citing the caliph al-Nasir li-din Allah on the obverse, the kalima on reverse, fully clear mint name above kalima, some weakness, always undated, VF, **RR** \$600 - 700

All known specimens of Badakhshan gold dinars of the early Great Mongol period are anonymous (except for the caliph) and all are from the same pair of dies.

399. **GREAT MONGOLS: Anonymous**, ca. 1230s-1250s, AR dirham (4.19g), NM, ND, A—, just *khan / al-'adil* on obverse, the kalima above uncertain symbol on reverse, appears to be unpublished, VF, **RRR**, ex *M.H. Mirza Collection* \$100 - 150

Tentative attribution. The term khan was first used by the Qarakhanids, then by the Mongols, but not by the Ghorids or Khwarizmshahs. The style of this piece suggests that it was struck in eastern Afghanistan of the Northwest Territories of Pakistan, most likely during the Mongol occupation of that area, most likely towards the middle of the 13th century.

400. **GREAT MONGOLS: temp.** Ögedei, 1227-1241, AR dirham (2.35g), Imil, AH635 (frozen), A-K1974, Zeno-144058 (same dies), *tengri kuchundur* (Mongolian for "by the power of the eternal God", in the Arabic script, date around // *al-imam / al-a'zam*, mint above, choice VF, **RR** \$220 - 300

401. **GREAT MONGOLS: temp.** Güyük, 1246-1249, AR dirham (2.12g), [Imil], ND, A-O1979, Zeno-3772, tamgha with uneven shoulders, "comma" to left, blundered Arabic around // 2-line blundered Arabic, intended for *al-imam / al-a'zam*, above average quality of strike, VF \$130 - 150

When legible, the date is always 644, the accession year of Güyük.

402. **GREAT MONGOLS: temp.** Möngke, 1251-1260, AR dirham (3.62g), NM, AH658, A—, Zeno-167701, undeciphered Nagari text around horse // 'adl' in center, surrounded by the date formula in Arabic, EF, **RRR**, ex *M.H. Mirza Collection* \$180 - 220

Struck during the reign of the Great Mongol Ögedei or very shortly thereafter.

405. **GREAT MONGOLS: Anonymous**, AR dirham (2.09g), Badakhshan, DM, A-3779N, *qa'an / al-'adil / sikka* in obverse center, date formula in margin (actual date off flan) // kalima in center, mint name in margin, unpublished and extremely rare, crude VF, **RRR** \$200 - 300

These two (lots 405 & 406) are the first reported silver coins of Badakhshan for the Great Mongol period.

407. **GREAT MONGOLS & Others:** LOT of 10 jitals & 1 miscellaneous coin: **Great Mongol:** anonymous Sijistan type A-A1973 (Fine); **Khwarizmshah:** Muhammad, type Tye-257 (1), Tye-267 (2), Tye-275 (Bust mint, 2), and Tye-284 (4), nearly all in EF condition; and **Gurjura:** common drachm of little value (Fine); retail value \$220, lot of 11 pieces \$100 - 140

Although the coin has Armenian text, the type is usually found around the Georgian city of Dmanisi, not in the Armenian territories.

Bennett thus regards this as a Georgian issue for a region with a sizable Armenian population.

Thus they are coins that had to be weighed, not counted, best regarded as gold ingots.

*Toghon Temür, also known by the posthumous name Shundi bestowed by the Hongwu Emperor of the Ming Dynasty, was a son of Kus'ala who ruled as emperor of the Yuan Dynasty and is considered the last Khagan of the Mongol Empire. He bore the period titles Yuan Tong 1333-1334, Zhi Yuan 1335-1340, and Zhi Zheng 1341-1368. This type was cast during a time of economic reform circa 1350, when the attempt was made by Chancellor Toqto'a to replace smaller size coinage with paper money and these larger coins. After the consignor had acquired possession of a house, he discovered the item in a old cabinet. Since he had lived in Hong Kong and China back in the 1980's he took an interest in researching the object, deciphered himself the characters Xian Feng Yuan Bao and concluded that this object could have some historical interest.

The house in question had been acquired in the early 1900's by the previous owner's ancestor after he had made money in the Far East in the second half of the 19th century, where he spent years as director of a trading house. One can assume that this extremely rare item came into the family's possession during this period. In order to learn more about the item, the owner then consulted Mrs. Helen Wang from the British Museum, Department of Coins and Medals, who directed him to Mr. David Hartill who wrote the book "Cast Chinese Coins". He then searched the internet to see which auction houses specialized in cast Chinese coins and came across our firm's name.

Porcelain gambling tokens were popularized during the Bangkok Dynasty (1782-1809). Most of these tokens were made from porcelain or ceramic. They were originally used by Chinese gambling houses in Bangkok. Due to the shortage of silver coins, these gambling tokens were found to be very useful and used in the daily life of the people until the 1870s. These porcelain tokens bore Chinese inscriptions naming the issuing house or wishing the users good fortune and featured pictorial designs mostly of Chinese origin. Very often, these gambling tokens were glazed with bright colors.

In this latter capacity, no doubt influenced by the success that greeted the Galerie Métallique des Grands Hommes Français in 1816, he undertook in 1817 the issue of a universal series of medals of famous men, calling upon some of the best known engravers. The Series Numismatica Universalis Virorum Illustrium includes more than 150 individuals, but if one takes into account die and edge variants, the total is more than 400 varieties.

All the medals were produced with a portrait of the celebrated Frenchman with simple biographical information on the reverse. The date of issue being dated simply in arabic numerals. These medals were very much restruck at later dates and are obvious by their edge markings denoting metal and period markings. The series is extensive and difficult to complete, least of all because it is hard to find a reference listing all the medals. La Médaille Française Au XIX Siècle et l'Histoire by Jean-Pierre Collignon details 119 medals allocated to the series.

At the end of 1830 Tolstoy received an order to create these medals. The artist created in wax all the reverses, as well as portrait of Nicholas I for the obverse. When approving designs for the medals the Tsar ordered to substitute this portrait for the Russian coat of arms-the two-headed eagle. From 1837 to 1839 A. Lyalin and P.A. Georg Heinrich von Görtz issued these emergency copper dalers to finance the Great Northern War with Russia. The emergency money was, with a circulation of some 4 million coins, not welcomed by the population and Sweden's government ultimately failed to buy the old coins from the market and to exchange them for coins of a more appropriate nominal value. In February 1719 Görtz had to pay for the general dissatisfaction with his beheading in Stockholm. The government's promise to accept the worthless coins as proper payment as soon as peace arrived was not kept after the peace of Nystad in 1721. Coins were still accepted but only for half their nominal value (16 öre), and the remaining coins began to circulate as 1 öre-pieces, some of which were overstruck with the new value.
