Likely struck before 1808, as an example with a large obverse cud was engraved for a marriage in 1808, whence the dies must have deteriorated before that year.

Two Important Egyptian Rarities: London Mint Proof of Record Specimens

1013. **EGYPT:** Fuad, king, 1922-1936, AR 10 piastres, 1933//AH1352, KM-350, London Mint Proof of Record specimen, of which only two proof examples are known (the other known specimen was deaccessioned from the Melbourne mint museum in Australia some years ago), essentially as struck but for cabinet toning over deeply mirrored fields consistent with the finest workmanship of the Royal Mint, RRR, PCGS graded Proof 64 \$6,500 - 8,500

One of the greatest rarities of modern Egypt, never released to the public in proof, and much rarer than the 1937 Farouk silver proofs. This is a once-in-a-lifetime opportunity to acquire this type in proof.

1014. **EGYPT:** Fuad, king, 1922-1936, AR 20 piastres, 1933//AH1352, KM-352, London Mint Proof of Record specimen, of which only three proof examples are known (all graded by PCGS or NGC, two as PF64, one as PF63), never released to the general public, like the 10 piastres intended either for donation to museums or to be kept in the Royal Mint cabinets, RRR, PCGS graded Proof 64 \$9,000 - 11,000

Another of the greatest rarities of modern Egypt, and a magnificent mate to the 10 piastre 1933//AH1352 in this auction (Lot #1013).

The Mint Report (1931) reports 124 specimens struck in gold, silver and bronze and whilst it does not break this down further it must be assumed that the majority were in bronze. As well as a formal reception at Guildhall in London, on 5 July 1927, King Fuad's visit included a trip to Horrocks Cotton Mill in Preston, Lancashire, and staying with Mrs. Greville at Palsedon Lacey. A similar example sold in our Auction 17, Lot 1805 for \$1100.

This issue was produced during a time when there was a dire shortage of coinage in the country. There were many Peruvian coins in circulation at the time, but most did not meet the government standards for circulating coin. Since some of the Peruvian coinage in circulation did comply with government standards, it was decided to counterstamp these coins so that the public would have confidence to accept them at their bullion value. The countermarking was actually done in 1840, even though the countermark die is dated 1839, according to Roberto Jovel.

From this reign onwards, virtually all Kushan dinars adhere to the two standard designs for the reverse. All share the same obverse, derived from Vasu Deva I, without the nandipada, but with several Brahmi characters, as listed by Mitchiner (the nandipada was added to the obverse on post-Kushan dinars issued by the Kushano-Sasanian and Kidarite kingdoms). The western reverse has Siva and the bull Nandi. The eastern reverse has the deity Ardoksho enthroned, holding diadem & cornucopiae.

Vasu Deva II was formerly called Vasu Deva III, with various sets of reign dates from the late 200s to the mid 300s. He was called Vasu Deva III, because the general series of Vasu Deva I (ca. 191-230+) was divided into two reigns, Vasu Deva I identified by just one trident in the obverse, Vasu Deva II with two tridents in the obverse. These two versions are now assigned to a single ruler, Vasu Deva I.

Intermediate type between Cribb-11 and Cribb-12, with the name of Varahran as on Cribb-11, but with the additional symbol beneath the Kidara tamgha as on Cribb-12.
