The term miri is a shortened form of amiri, i.e., "of the amir". Two miri would be 2/3 of a reduced tanka of about 2.38g (type #2436), which is known from dated examples 906-910. If one turns the reverse 1/4 to the left, then there is a symbol at the left that closely resembles the number 9, a large pellet to the right, as usual for zero, and another 9-like symbol at the bottom.
