These Gansu coins were issued between 1914 and the mid 1920s when a formal mint was established and province began to issue its own coinage. These coins were from brass recovered from melting imperial Chinese cast cash coins, which were still in circulation. The author has a German-English dictionary specifically for numismatic technical terms which makes it so the layman and the professional can more easily communicate about the hobby. Standard German-English dictionaries are not as useful as this wonderful little book since in numismatics there are many technical terms, which are not found in a regular dictionary. Great to use when reading auction catalogs or websites in either language \$14</p>
